SUPPORT / CONTACT

System adaptations according to your requirements are possible on request .¹

Important:

Please inform yourself about the legal regulations and provisions of your federal state for the installation of a building-independent photovoltaic system before purchasing. It may be necessary to adapt the frame statically to the local conditions. The SOLgarden system is designed according to system statics, but is expressly offered without site-specific statics. If required, this can be provided for an additional charge.¹ System adaptation for an additional charge
